## SW developer/tester | Executive | Strategist

I don't have a linear career story.

I've led a company, managed teams, launched projects, survived crises, and taught myself software development from scratch. I thrive in chaos, lead with clarity, and learn faster than most because I've had no choice.

I'm looking for an opportunity where humanity, systems-thinking and bold learning meet.

## Work Experience

Freelancer  
Aug 2024 – Present

### Junior SW development and testing, remote work

Focused on full stack development (HTML, CSS, JS, Python) while working remotely across Europe. Worked from Iceland, Austria, Portugal, Spain, and Egypt. Built technical skills through self-study, real-life problem-solving, and deep personal growth through travel.

Valeolla, s.r.o.  
May 2021 – July 2024

### Executive director

Led a 5-member team of legal and grant experts in the renewable energy sector. Oversaw project audits, compliance processes, and strategic communication with Czech ministries (MMR, MŽP, MZe). Handled legal support, business development, and internal strategy.

Doxologic, s.r.o.  
Nov 2020 – May 2022

### Business Development, Client Consultant – Fintech, Cybersecurity

Managed business development, sales support, and client care in two high-paced technology sectors – fintech and cybersecurity. Identified new business opportunities, maintained and expanded client relationships, and supported onboarding and solution-driven sales strategies. Acted as team mentor while ensuring personalized service and technical understanding.

## Education

South Bohemia  
University  
2020–2023

### Bc. of Economic, management

Completed coursework in business strategy, project management, and accounting. Left university to pursue hands-on entrepreneurial and leadership experience.

Iuventas, s.r.o.  
2016–2020

### Gymnazium

General secondary education with specialization in biology and natural sciences.

## Education

Self-directed Learning 2024 – present	Full stack web development W3Schools, FreeCodeCamp Hands-on training in HTML, CSS, JavaScript, Python, and SQL. Focus on practical application development, version control, UI/UX logic and testing
Foundation courses 2022	Cybersecurity & Risk Management Intensive certified programs covering cybersecurity fundamentals and management (2 × 6-hour modules).

## Superpowers

### Personal

Radical honesty – I say what others think but won't say  
Emotional resilience – I've survived real-life chaos, and I still show up  
Creative problem-solving – I invent solutions when there are none  
Fast learner – self-taught developer, strategist, and builder  
People-first mindset – I lead with empathy, not ego  
Independent & goal-driven – I don't need permission to make progress

### Professional

Full Stack Web Development (HTML, CSS, JS, Python, SQL) – self-taught  
Google Ads, e-mail marketing – advanced  
Canva & visual design – advanced, InDesign, Photoshop – basic  
Linux, Windows, MacOS – power user  
Project and team coordination – hands-on  
Client communication (B2B/B2C) – professional fluency

## Successes, Failures & What's Next

I've led a company at 23, managed audits for millions, built teams from scratch, and learned how to code by sheer willpower. I've also gone broke, lost my direction more than once, faced personal breakdowns and started over – multiple times. But every restart sharpened me. Every fall clarified what matters. My greatest success? That I never stopped. My greatest failure? Thinking I needed to be perfect before I deserved peace or progress.

Now I build with honesty. I show up – messy but real. And I'm ready to create something that matters – with people who value both skill and soul.
